

# ActewAGL Joint Venture Environmental, Social & Governance Framework

At ActewAGL we recognise our responsibility to our community, customers and employees to operate sustainably, with integrity and contribute to a fairer future. ESG looks beyond simply environmental sustainability and refers to a broad set of environmental, social and governance factors that can influence business strategy and create value for all stakeholders. In developing an ESG framework, we are taking steps to communicate and progress our ESG commitments and ensure our strategic direction aligns with ESG principles. As the energy landscape changes at a rapid pace, an ESG focus ensures we are taking a responsible and considered approach to deliver long-term value, in line with the expectations of those within our operational footprint.

Our ESG framework aligns with the United Nations Sustainable Development Goals and centralises our initiatives in a single cohesive structure enabling our customers greater insight into the way we do business.

## ENERGY & ENVIRONMENT

ActewAGL supports the transition to clean energy and recognises the important role we play in caring for our environment and reducing the impacts of climate change. In reducing our impact on the environment and playing a key role in the energy transition, our focus is on ensuring we support and inform our customers.

## SOCIAL RESPONSIBILITY

ActewAGL acknowledges the important responsibility we have in positively impacting our employees, customers and community. We are proud of our local history and connection to the Canberra region and will continue to strive for positive outcomes for those within our sphere of influence. Our social responsibility commitments are an integral part of who we are and reflect the culture and values of our organisation and community.

## GOVERNANCE & MANAGEMENT

ActewAGL operates in a heavily regulated environment and is governed by a Board and its committees that ensure we meet all statutory and regulatory obligations. We have robust governance and risk management systems that minimise business risk, and ensure safety, transparency and accountability. We are committed to continuous improvement and engagement with stakeholders to inform our decision making.

## OUR OBJECTIVES

- Respond and adapt to climate change
- Be responsible stewards of the environment
- Advance and support a clean energy future

- Exceed customer expectations
- Play our part in progressing reconciliation with First Nations peoples
- Promote diversity, equity and inclusion
- Foster an exceptional workforce
- Inform and support our community

- Ensure safety comes first
- Work with integrity and adhere to a high ethical standard
- Protect against security threats and prepare for business disruption events
- Strive for thought and leadership diversity

## Our commitments align with the following United Nations Sustainable Development Goals:
